

Safety Footprint Ltd

Expertise

Safety Footprint provides a professional construction health & safety consulting service to clients, principal contractors, contractors and designers in the construction industry across all major sectors, taking in new-build, refurbishment, maintenance and demolition works.

We are flexible and provide as much or as little support as required for either short- or long-term results.

By keeping the process simple and straightforward, we help our clients discharge their health and safety duties in as easy a manner as possible.

We can help you with the basics:

Health & Safety
Policies

Safe Systems of
Work

Accreditation
Schemes

Site inspections

Health & Safety
Training

Strategy

What we would really like to help you with is developing your health and safety strategy.

We believe that a strong, well-defined strategy is the foundation of a successful health and safety footprint.

By working together, we can help you to create, design, strategize, plan, map journeys, track progress, and see solutions that not only ensures compliance but also drives continuous improvement, engages your workforce, and embeds safety as a core value in your business.

Our focus is on creating tailored solutions that align with your goals, ensuring long-term success and a safer environment for everyone.

Our approach is collaborative, dedicated and meticulous as we engage with the client, designers and contractors to help set out the plan and timetable.

Any Questions?

If you have any questions regarding our services, feel free to get in touch.
